

JOB STORY 30

Trenching: AOL Duct Bank
Trenches Virginia

Trench to be drilled alongside the duct bank

Drilling 2 1/2" holes through 5 feet of overburden

Digging Trench with 325

Note Holes with Da-mite

Trench Lines for electrical duct bank for a large AOL facility. The duct bank had to be routed from an electrical across a narrow easement where no blasting was allowed.

Daigh Company was called to assist on Dec 21st, a local driller was lined up, utility locates had to be procured and drilling started on the 29th of Dec. Da-mite was used in over 800 lineal feet of ditch line and in several deep man holes to pre break the rock to help meet an installation deadline. Cuts were deep and in one area

Daigh had the driller not only do the ditch but add an angled row of holes to lay back the ditch for safety. 2 1/2" holes, 10ft-14ft cuts

Preparing to lay pipe in trench

Two manholes next to power lines 13ftx21ftx18ft

Two manholes 13ftx21ftx18ft

Manhole pit after excavation

Job complete on 20th of Jan, with additional Storm Drain trench to be dug out at later date. Customer used 1500 boxes of Da-mite.
