

Daigh Company Job Stories

#10 RR Piers

New bridge was build over old bridge. When new bridge was ready, So Pac finished drilling holes in pier, loaded material and then set new bridge. Prior to this method RR had been blasting out these piers. Blaster had a bad day got new bridge and RR decided that eliminating that risk was worth it.

Adding holes at last minute

Cracking to cold joint and depth of drilled holes

Removing pieces. Everyone likes to break things.

Trains are running no delay, pier will be
